Career Skills

I have taken every computer class available so I am familiar with MS Word, Excel, Power Point, and DreamWeaver. My main skills in graphic design as a high school student was their graphic design class where I got experience using a print press, screen printing, and flexography. I have a Graphic Design Degree from the Madison MATC and I am quite familiar with Adobe Illustrator, Photoshop, and InDesgn. I'm a fast learner and can easily multi-task.
